**23. Aims of programme**

To provide a comprehensive foundation in the principles and applications of One Health as they apply to infectious diseases and other consequences of the interactions between ecosystems, humans and animals.

Describe how and when students will receive feedback, individually or collectively, on their progress in the course overall.

Most modules have a formative assessment, appropriately aligned with Module learning objectives. Formative assessment activities are designed to enable students to assess their progress and help them identify and plan their further learning needs: dialogue between the student and their tutor/lecturers and peers together

**31. Programme structures and requirements, levels, modules, credits and awards**

NB: Students planning more than a Stage ahead should be aware that the College will not deliver any module or part of a programme if circumstances have changed to threaten its quality or viability. Such offerings could change after a student has started the course. However
